Training Notice:

Here's an opportunity to attend a specialized training course "Backflow Prevention and Cross Connection Control" for persons interested in gaining **certification** as backflow assembly testers. Class will be 6-9 pm every Tuesday and Thursday evenings. Length of training will be 36hrs. This training is designed for mechanical contractors and others in the plumbing or lawn irrigation industries, municipal water supply employees, operators and maintenance professionals.

Topics:

- State and federal regulations on backflow prevention / cross connection control
- Developing a cross connection control program
- Liabilities associated with backflow
- Classification by degree of hazard
- Urban, industrial, rural and agricultural needs for protection, who pays?
- Consequences of failure to test
- Devices and their applications
- Operation, maintenance, testing of assemblies/devices
- Proof of ability to test assemblies/devices
- Final examination; test review

Backflow Tester/Repairman's Certification

What you get:
