Training Notice:

Here's an opportunity to attend a specialized training course "Backflow Prevention and Cross Connection Control" for persons interested in **recertification** as backflow assembly testers. This training will be on a Saturday. Class will start at 8:00 am and end at 5:00 pm. Lunch is on your own. **Please bring your own tester.** This training is designed for mechanical contractors and others in the plumbing or lawn irrigation industries, municipal water supply employees, operators and maintenance professionals.

This course involves extensive hands-on training with various backflow prevention / cross connection control devices and assemblies.

Kansas statutes lay the ultimate responsibility for cross connection control programs on public water supply systems.
