

1 **RESOLUTION NO. 8818**

2 A RESOLUTION introduced by City Manager Jim Colson setting forth the City of Topeka’s
3 policy for debt management; and rescinding resolution no 7554.

4 WHEREAS, the vitality and economic prospects of a City can be measured by the service
5 delivery potential of its infrastructure; and

6 WHEREAS, a significant portion of a city’s ability to influence and/or encourage
7 economic development can be measured by the adequacy of its infrastructure and its capacity to
8 support growth; and

9 WHEREAS, it is the responsibility of the Governing Body, the City Manager and other
10 appointed city staff, as trustees for the City of Topeka’s (“City”) infrastructure and physical plant
11 and their related service delivery capacity, to:

- 12 1. Maintain the existing assets to ensure continued serviceability;
- 13 2. Provide for additions, modifications, and expansion as needed and, when possible, in
14 reasonable anticipation of change;
- 15 3. Ensure that the costs of this effort are borne equitably by each generation of taxpayers,
16 rate-payers, users, and other beneficiaries over a relevant period of time;
- 17 4. Employ the use of debt to complement, and not to supplant, significant recurring
18 commitments of annual appropriations for capital purposes;
- 19 5. Act as responsible fiduciaries during their tenure as City officials, to ensure the transfer
20 to their successors of City infrastructure, physical plant, and service delivery capacity in
21 equal or better condition as they received them from the preceding officials; and
- 22 6. Maintain the City’s sound financial position, reasonable reserves, and strategic and
23 reasonable debt position, thereby enhancing the City’s corporate image, creditworthiness,
24 flexibility, and its related ability to meet the challenges of each new day, decade and
25 generation.

26 NOW, THEREFORE, BE IT RESOLVED by the City of Topeka, Kansas, that City
27 Council hereby adopts the following policy to establish debt issuance and management
28 guidelines for all debt financing for the City of Topeka.

29 **SECTION 1. RESPONSIBILTY FOR DEBT MANAGEMENT**

- 30
- 31 A. The primary responsibility for debt financing recommendations rests with the Director
32 (the “Director”) of the Administrative and Financial Services Department (the

33 “Department”). In developing such recommendations, the Director shall be assisted by
34 City staff, including other members of the Department. The responsibilities of City staff
35 shall include:

- 36
- 37 a. Ensuring adherence to this Debt Management Policy (the “Policy”);
- 38
- 39 b. Considering the need for debt financing in the context of the existing Capital
40 Improvement Budget and any other programs or planned improvements deemed
41 necessary by the City Manager;
- 42
- 43 c. Reviewing changes in federal and state legislation that affect the City’s ability to
44 issue, service or administer its debt financings and report such findings to the City
45 Manager as appropriate;
- 46
- 47 d. Reviewing annually the provisions of ordinances authorizing the issuance of
48 general obligation debt of the City;
- 49
- 50 e. Reviewing opportunities for refinancing existing debt for reasons economical or
51 otherwise deemed advantageous to the City; and
- 52
- 53 f. Recommending services by a financial advisor, bond counsel and other debt
54 financing service providers as appropriate.
- 55

56 B. In developing financing recommendations, City staff shall consider:

- 57
- 58 a. Options for interim financing including short-term and inter-fund borrowing,
59 taking into consideration federal and state reimbursements;
- 60
- 61 b. The effects of financing plans on existing and potential tax rates and user fees;
- 62
- 63 c. Interest rates, financing costs, available financing alternatives and other capital
64 market and financing trends; and
- 65
- 66 d. Other factors deemed appropriate.
- 67

68 **SECTION 2. POLICIES**

- 69
- 70 A. The City shall annually forecast debt-funding requirements on a five (5) year basis to
71 facilitate enhanced short-term decision-making, and to examine the long-term
72 implications of existing and contemplated debt financings.
- 73
- 74 B. All other things being equal, the City shall prefer debt financing supported by user fees or
75 special charges to debt financing supported by taxes.
- 76
- 77 C. The City shall not fund the costs of current operations or routine maintenance with long-
78 term debt financing.

122
123
124

- D. The City shall use debt financing primarily to finance capital projects with a relatively long life, typically no less than ten (10) years, excepting unusual or infrequently purchased equipment, which shall have a useful life of no less than five (5) years, and cost no less than one hundred twenty-five thousand dollars (\$125,000).

- E. The City shall maintain consideration for its statutorily limited debt capacity and restrict its use of debt financing to situations in which it is deemed more affordable, prudent or otherwise more advantageous than the use of “pay-as-you-go” financing for achieving the City’s objectives or adhering to its policies.

- F. The City shall restrict the use of long-term debt financing and capital leases to fund capital acquisitions, improvements, projects or equipment to the following circumstances:
 - a. The project is included in the City’s Capital Improvement Budget;
 - b. The project is the result of growth-related activities within the community that require unanticipated and unplanned infrastructure or capital improvements by the City;
 - c. The project’s useful life, or the projected service life of the equipment, is expected to be no less than the term of the financing;
 - d. Existing or projected revenues are sufficient to service the planned debt;
 - e. The cost of the asset or assets financed would place an undue burden on today’s current tax- or rate-payers if financed on a pay-as-you-go basis; or
 - f. The use of debt is necessary to promote the stability over time of the City’s property tax demands or user fee levels.

- G. The City shall adhere to the following financing guidelines:
 - a. When measuring its commitment to its infrastructure and related service delivery potential, the City shall appropriately address its capital, operating and maintenance needs.
 - b. Capital acquisitions, improvements, equipment, and projects are categorized into either “pay-as-you-go” or “debt financing” classifications. The City shall evaluate each project to determine the most affordable and/or advantageous method of financing with consideration for the following principles. In general, pay-as-you-go capital projects shall be characterized by a cost of no more than one hundred twenty-five thousand dollars (\$125,000), an asset life of no more than five (5) years, or an improvement that is expected to extend the useful life of an existing capital asset by no more than five (5) years. Debt financing capital projects shall generally be restricted to major, non-recurring capital expenditures for assets or

- 125 asset improvements costing in excess of one hundred twenty-five thousand dollars
126 (\$125,000) and having an expected useful life in excess of five (5) years.
127
- 128 c. When measuring inter-period equity for capital needs, the City shall appropriately
129 balance considerations for allocating its debt burden among those constituents
130 positioned to benefit from the financed assets, and the need to distribute the
131 financing burden over appropriate fiscal periods.
132
- 133 d. Unless other methods are deemed more appropriate and/or advantageous, the City
134 shall amortize individual long-term financings to simultaneously produce
135 substantially level annual debt service while, on an aggregate outstanding debt
136 service basis producing substantially downward-sloping debt service demands.
137
- 138 e. The City shall maintain a minimum ratio of Combined Utility Fund revenues to
139 maximum annual combined utility debt service requirements of one hundred
140 twenty-five percent (125%), with a target of ensuring that annual coverage
141 exceeds two hundred percent (200%) in each year.
142
- 143 f. The City shall make efforts to maintain the average maturity of its general
144 obligation bonds at or below fifteen (15) years.
145
- 146 g. The City shall make efforts to maintain the average maturity of its revenue bonds
147 at or below thirty (30) years.
148
- 149 h. The City shall amortize debt financing for capital projects over a term not to
150 exceed the average useful life of the financed assets.
151
- 152 i. The City shall review at least annually its outstanding debt for economic
153 refunding opportunities. The City shall evaluate refunding opportunities on a net
154 present value savings basis, considering for execution those refunding
155 opportunities that stand to produce present value savings as a ratio of refunded
156 principal of no less than three percent (3%), five percent (5%) and seven percent
157 (7%) for current, advance and synthetic refundings, respectively. Refunding or
158 restructuring opportunities that do not meet these minimum savings thresholds,
159 but are otherwise determined to produce substantive economic, strategic,
160 budgetary or other material benefits to the City may be considered. Unless an
161 alternative structure is deemed to serve a particularly prudent, economical or
162 strategic purpose, refunding savings shall be structured substantially evenly over
163 the life of the refunded bonds, or in a manner to reduce the terms of the bond
164 repayment cycle.
165
- 166 j. The City may consider the use of debt financing alternatives or programs, such as
167 State Revolving Fund loans, when such alternatives are deemed advantageous
168 and/or appropriate.
169

170 k. The City shall maintain compliance with all rules and regulations of the Securities
171 and Exchange Commission (the “SEC”) and the Municipal Securities Rulemaking
172 Board (the “MSRB”), including those concerning ongoing continuing disclosure
173 standards and practices. The City maintains a written post-issuance compliance
174 policy related to its tax-advantaged financings.
175

176 **SECTION 3. DEBT ADMINISTRATION AND FINANCING**
177

178 A. The Department shall be responsible for preparing the preliminary and final official
179 statements as required for the City’s debt offerings, and for ensuring ongoing compliance
180 with secondary market disclosure requirements. In the case of general obligation bonds,
181 the Department is also responsible for ensuring an estimate of the mill levy required to
182 service any proposed debt financing is provided to City Council.
183

184 B. The City Clerk shall be responsible for collecting and maintaining all supporting
185 documentation, such as City Council meeting minutes and relevant resolutions and
186 ordinances, as well as for receiving and maintaining sufficient copies of the preliminary
187 and final official statements, and the full transcript of publicly issued debt, in accordance
188 with federal and state regulations.
189

190 C. The City shall invest bond proceeds pursuant to its investment policy and with adherence
191 to all applicable state and federal regulations.
192

193 D. The City shall engage external, independent bond counsel for all debt issuances. The
194 Director, or other City staff delegated at the Director’s discretion, is responsible for
195 establishing and administering an equitable selection process for engaging bond counsel.
196 All debt issuances shall include a written opinion by bond counsel affirming that the City
197 is authorized to issue such debt, stating that the City has met all federal and state
198 constitutional and statutory requirements necessary for its issuance, and opining on the
199 debt’s federal and state income tax status.
200

201 E. The City shall engage an external, independent financial advisor for all debt issuances.
202 The City’s financial advisor shall be registered as a “municipal advisor” under applicable
203 Federal law. The Director, or other City staff delegated at the Director’s discretion, is
204 responsible for establishing and administering an equitable selection process for engaging
205 a financial provider. For debt issuance, the financial advisor shall provide the City with
206 advice and guidance on the preparation, structure, timing, and pricing of the issuance.
207 The financial advisor shall be prepared to provide post-pricing analysis or ongoing
208 research, data and analytics as requested by the City.
209

210 F. The City may use short-term financing, such as Temporary Notes, to meet temporary
211 financing requirements for projects until the final cost of the project is known or can be
212 accurately projected. In some cases, projects may be funded with internal funds that will
213 be reimbursed from proceeds of long-term debt issued at a future date.
214

215 G. Credit Enhancement may be used if the cost of acquiring such Credit Enhancement is
216 determined to reduce the City’s borrowing costs and/or facilitate other advantageous
217 borrowing terms or improved marketability for the debt financing.
218

219 H. The City shall seek to issue its Temporary Notes, General Obligation Bonds and Revenue
220 Bonds through a competitive sales process. In instances in which the City deems the
221 result of an attempted competitive sale as unsatisfactory, it may, at the election of the
222 City Council, enter into negotiation with an underwriter for the sale of the bonds where
223 permitted by Kansas law. For circumstances in which the Director deems a prospective
224 debt issuance as unusually complex, extraordinary, or otherwise unsuitable for a
225 competitive sale process, the Director may recommend pursuing a negotiated sale process
226 within the constraints of all applicable laws and regulations.
227

228 **SECTION 4. CONDUIT FINANCING**
229

230 A. The City may sponsor conduit financings in the form of Industrial Revenue Bonds and
231 similar instruments for activities (i.e., economic development, housing, health facilities,
232 etc.) that are expected to serve a purpose of the general public, and are consistent with the
233 City’s overall service and policy objectives as determined by the City Council.
234

235 B. The City shall take appropriate measures to ensure that it is insulated wholly from credit
236 risk and repayment exposure with regard to any conduit financings. All conduit
237 financings must be reviewed and approved by a City staff review committee before being
238 submitted to the City Council for consideration. City staff shall also approve of the
239 selection of the underwriter and bond counsel for such conduit debt, ensure compliance
240 with secondary market disclosure and federal arbitrage requirements, and establish
241 minimum acceptable credit ratings for such conduit debt. The applicant will reimburse
242 the City for its own financial advisor and/or issuer’s counsel to provide advisory services
243 on the transaction.
244

245 C. The City may charge an application fee related to conduit issuance to cover its costs of
246 administration of the financing, both at execution and over the life of the bonds. The
247 Department shall produce a schedule in writing of such fees and shall provide such
248 schedule to any conduit borrower at the time it applies for such financing.
249

250 **SECTION 5. ARBITRAGE LIABILITY MANAGEMENT**
251

252 A. Federal arbitrage legislation is intended to discourage entities from issuing tax-exempt
253 obligations unnecessarily. In compliance with the spirit of this legislation, the City shall
254 not issue debt financing except for the purpose of financing clearly identifiable projects
255 with reasonable prospects for timely initiation and completion. The City shall
256 strategically issue temporary financing and subsequent long-term tax-exempt debt in a
257 manner that ensures the timely and appropriate expenditure of bond and note proceeds.
258

259 B. Because of the complexity of arbitrage rebate regulations and the severity of non-
260 compliance penalties, the City may engage external consultants to provide arbitrage

261 calculation and compliance services. Such consultants shall be chosen at the discretion of
262 the Director.

263

264 **SECTION 6. CREDIT RATINGS**

265

266 A. The Director is responsible for maintaining relationships with the rating agencies that
267 assign credit ratings to the City’s bond and notes. This effort includes providing periodic
268 updates on the City’s general financial condition, along with coordinating meetings and
269 presentations in conjunction with each new debt issuance, as appropriate.

270

271 B. The City shall maintain a credit rating on its bonds and notes from at least one rating
272 agency designated by the SEC as a Nationally Recognized Statistical Rating Organization
273 (NRSRO). The Director shall hold responsibility for determining which rating agency or
274 rating agencies the City shall engage to rate its bonds and notes.

275

276 C. The City shall make efforts to achieve, maintain, and as deemed feasible and appropriate,
277 improve its bond and note credit ratings to no less than the following standards in an
278 effort to achieve favorable interest rates and borrowing terms and preserve access to
279 capital markets:

280

281 a. General Obligation Bonds rated not less than the third highest rating (including
282 modifiers) by at least one NRSRO.

283

284 b. Revenue Bonds rated in not less than the fourth highest rating (including
285 modifiers) by at least one NRSRO.

286

287 c. General Obligation Temporary Notes rated in the highest category available from
288 at least one NRSRO.

289

290 D. The City shall work to maintain a debt profile characterized by the following criteria,
291 which has been established with consideration for criteria published by rating agencies
292 that is characteristic of the credit rating quality the City wishes to preserve.

293

294 a. Direct Debt as a ratio of estimated actual (market) value of taxable property
295 within the City’s corporate limits shall not exceed three percent (3%).

296

297 b. Direct Debt as a ratio of total governmental funds’ revenue shall not exceed one
298 hundred twenty percent (120%).

299

300 c. Direct Debt Service Expenditures as a ratio of total governmental fund
301 expenditures shall not exceed fifteen percent (15%).

302

303 d. Not less than 65% of the City’s general obligation bonds shall amortize within the
304 ten years next succeeding the current year.

305

- 306 e. For any given year, net revenues available for debt service shall be not less than
307 two hundred percent (200%) of debt service associated with Senior Lien
308 Combined Utility Revenue Bonds.
309
- 310 f. For any given year, net revenues available for debt service shall be not less than
311 one hundred ten percent (110%) of combined debt service associated with Senior
312 Lien Combined Utility Revenue Bonds, Subordinate Lien Combined Utility
313 Revenue Bonds and State Revolving Fund loans.
314
- 315 g. Days of cash on hand, as defined by the NRSROs then-rating the City, shall not
316 be less than 185 for the Combined Utility
317

318 SECTION 7. DEFINITIONS OF TERMS 319

- 320 A. "Arbitrage" is defined here as the difference between the interest paid on tax-exempt
321 municipal bonds and the interest earned by investing the bond proceeds in higher-
322 yielding securities. Federal income tax law typically restricts arbitrage yield earned on
323 the investment of tax-exempt bond proceeds.
324
- 325 B. "Arbitrage Rebate" is defined here as the amount of arbitrage earnings in excess of
326 arbitrage yield restrictions on tax-exempt bond proceeds that must be remitted to the
327 federal government.
328
- 329 C. "Credit Enhancement" is defined here as the utilization of the credit of an entity other
330 than the issuer or obligor to provide supplementary security for debt financing. Credit
331 enhancement often takes the form of bond insurance, which is a guarantee by a bond
332 insurance provider to make timely principal and interest payments in the event the
333 obligor fails to do so. The benefit of credit enhancement is increased security for
334 bondholders, which may translate into a more receptive capital market and/or higher
335 credit ratings and lower borrowing costs.
336
- 337 D. "General Obligation Bonds" is defined here as bonds backed by the full faith and credit
338 of the City. The taxing power securing general obligation bonds includes an unlimited ad
339 valorem tax levied on real property in an amount sufficient to service general obligation
340 principal and interest payments. A special tax rate is levied annually to service general
341 obligation debt service. General Obligation Bonds are typically considered very strong
342 credits, often characterized by high marketability and lower relative borrowing costs
343 compared to Revenue Bonds.
344
- 345 E. "Direct Debt" is defined here as the City's outstanding gross debt burden including all
346 general obligation and tax-supported bonds, notes, loans and capital leases and any other
347 debt secured by a general obligation of the City (as further defined by the NRSROs used
348 by the City).
349
- 350 F. "Direct Debt Service Expenditures" is defined here as debt service expenditures
351 associated with Direct Debt in any given year.

352
353
354
355
356
357
358
359
360
361
362
363
364
365
366
367
368
369
370
371
372
373
374
375
376
377
378
379
380
381
382
383
384

G. “Revenue Bonds” is defined here as bonds secured by revenues generated from the operation of a City utility, facility, service or other program. Such revenues may arise from dedicated user fees or service charges. The planning for, and issuance of, Revenue Bonds can be more complicated than that of General Obligation Bonds due to the often nuanced nature of the former’s security structures, and the complexities involved in forecasting and implementing changes in revenues to service debt financing through user fees and service charges.

H. “Special Assessment Bonds” is defined here as bonds issued to develop facilities and basic infrastructure for the benefit of privately owned properties within a particular assessment district. Assessments are levied on properties benefited by the project and used to service the debt. The issuer’s recourse for the non-payment of assessments is property foreclosure, at which point the balance of the special assessment debt becomes a direct obligation of the City.

I. “Temporary Notes” is defined here as a short-term obligation issued to provide immediate financing that is expected to be paid or refinanced by the issuance of additional Temporary Notes or long-term financing at a future date. Temporary Notes typically mature in one year or less, and are limited to a maximum maturity of four (4) years under state law.

PASSED AND APPROVED by the Governing Body on October 4, 2016.

CITY OF TOPEKA, KANSAS

ATTEST:

Larry Wolgast, Mayor

Brenda Younger, City Clerk
