Councilmember Hiller distributed an amendment to the ordinance. She stated that the amendment would change the total project budget amount from \$1,200,000 to \$700,000 on line 24; and delete the statement, "General Obligation Bonds including Temporary Notes" on line 28 of the ordinance. She reported that it has been determined that only 8% of the total project cost would be needed for the project design element instead of 10%.

Councilmember Hiller moved to amend the ordinance as distributed. The motion was seconded by Councilmember Wolgast.

Councilmember Alcalá asked how much it would cost to issue the temporary notes. He also asked how the project would be funded if temporary notes were not issued.

Jim Langford, Budget and Finance Director reported that it would cost the City \$7,500 in interest costs and an additional \$13,000 to \$15,000 to issue the temporary notes. He stated that the cost of the project could be funded from the City's pooled cash funds if sales tax revenues are not received when the project is complete; and the City's pooled cash funds would be replenished when the City receives the sales tax revenue.

Councilmember Archer questioned the design costs. He asked why a detailed financial breakdown of the project costs was not included in the project budget.

Councilmember Woelfel questioned if Section A, lines 19 and 20; and Section C, line 28 of the ordinance should be amended to reflect the same funding source and language consistency.

Jackie Williams, City Attorney stated that the proposed amendment would clean up the language regarding the funding source, and make certain the cost of the project is covered.

Councilmember Alcalá noted that if the project would need a different funding source it would have to be approved by the Council.

Joseph Ledbetter expressed concern with borrowing against funds the City does not currently possess. He also questioned the design and maintenance costs of the project and if the proper bidding procedure was followed.

Deputy Mayor Harmon asked when work would begin and projects completed; and how many projects currently listed on the City’s curb and gutter repair list would be included in the project and completed.

Mike Teply, Public Works Director stated that he anticipates work to begin within six to eight weeks following approval of the project. He reported that they are expecting two to three months of work to be completed, eliminating nearly half of all curb and gutter repairs currently listed within the City.

Councilmember Hiller reported that it would cost \$23,000 to complete one block of curb and gutter repair, the equivalent of the cost of the project. She stated that if the projects could be delayed until next year it would provide the City with the financial capacity to complete all street, curb and gutter repairs.

Councilmember Wolgast asked how the interest costs for the project would be funded.

Jim Langford, Budget and Finance Director stated that the interest costs could be funded through sales tax revenue or through the issuance of temporary notes.

Mike Teply stated that he believes the sales tax revenues and the 2010 Street Maintenance Plan could assist in completing all street, curb and gutter repair projects within the next year.

Joseph Ledbetter spoke in opposition to the project. He stated that even though it is likely construction costs would increase, the City would be paying too much in interest costs to justify starting the project early.
